

Master your SQL Server enterprise with MinionWare

minion
CORE

- Drive Space** *Alert using custom thresholds for low disk space. Predict growth, and generate reports for disk expansion.*
- Server Inventory** *Automatically collects information on CPU, memory, disks, Windows and SQL version for managed servers.*
- Impact Analysis** *Password change impact analysis, against every service, on all managed servers in the enterprise!*
- Saved Drive Shares** *Create the same set of shares – with the same permissions – on a server for disaster recovery.*
- Service Down Alerts** *Alert for stopped SQL Server services, and create custom alerts for any stopped service!*
- Replication Latency** *Alert on transactional replication when latency increases past your threshold.*
- Script DB Objects and Jobs** *Track objects and jobs; easily undo accidental object changes or deletes.*
- Check Versions and Patches** *Minion Core shows which servers are behind on OS or SQL patches.*
- Index Scripting and Tracking** *Investigate or compare indexes across multiple databases.*
